---

[1] Compensation shown includes dependency allowances of 5 percent of net income for a spouse (maximum $3,000) and $400 per child, and assumes, for presentation purposes, a family of four.

[2] U.S. nationals are not reimbursed for U.S. federal tax payments. However, under the Economic Recovery Tax Act of 1981, U.S. citizens are entitled to a deduction of $80,000 from overseas earned income in 1984.

[3] Residence provided by ADB.

[4] Under the Provisions of Section 3-B of the Asian Development Bank Act, the USED is entitled to compensation and allowances equal to those authorized for a Chief of Mission, Class 3, within the meaning of the Foreign Service Act of 1964. The USED is entitled to receive the salary ($69,600) of a Chief of Mission. He also has a residence provided by the U.S. Treasury Department.

[5] No U.S. citizens are involved. Compensation is paid in Philippine pisos; for illustrative purposes it is shown here in dollars converted at a rate of 20 pisos to the dollar and assumes no dependency allowance.

[6] The U.S. Alternate Director receives his normal civil service GS salary plus overseas allowances appropriate to Manila.

Detail may not add due to rounding.

1/ Salary ranges after last salary adjustment, May 1, 1984. Salary paid to non-U.S. citizens; non-U.S. citizens are not liable for U.S. Federal and State income taxes on their Bank salaries. Salaries for EDs became effective after the Board of Governors vote in July, 1983.

2/ Salary paid non-U.S. citizens including tax equivalency (dependency) allowance consisting of (1) for spouse 5% of net salary upto a maximum of $3,000; (2) for each child $420. For presentation purposes we have assumed a spouse and two children.

3/ Salary paid U.S. citizens in professional grades assume spouse and two dependents; for non-professional grades the employee is assumed to be single; Washington Metro residence, and is "grossed up" by IBRD using 1984 Arthur Andersen average deductions tax tables to bring their compensation to levels generally comparable to those enjoyed by non-U.S. World Bank employees and employees in comparator organizations.

4/ Including a representation allowance of $55,000.

5/ Including supplemental allowance: For Executive Directors and Alternate Executive Directors, $8,500 and $6,800 respectively.

6/ The non-U.S. Executive Directors and Alternates are paid the net salaries shown, while the U.S. ED and Alternate are limited to the gross salaries paid to Executive level IV ($72,300) and V appointees ($68,700), respectively, under the terms of PL9-148.

NOTE: The gross salaries shown for U.S. employees of the IBRD reflect the new method of computation that became effective on January 1, 1980, for employees joining after that date. Employees on-board prior to the end of CY 1979 will receive slightly higher salaries than shown during a transition period to the new computation methodology that will end on December 31, 1985.

---

[1] FY 1985 and FY 1986 costs are based on preliminary estimates of staffing levels for individual offices and bureaus. Increases from FY 1984 are generally the result of increased costs of salaries resulting from the January 1985 raise and annualizing the cost of the January 1984 pay raise.

[2] FY 1986 reduction reflects transfer of personnel from IG/LAC in AID/W to Honduras.

[3] Increase in FY 1985 is due to the purchase of a new mainframe computer.

a/ Contributions pledged in currencies other than U.S. dollars and not yet paid are recorded at the UN rate of exchange prevailing at the time pledged. Those paid are valued at the rate prevailing at the time of payment.

b/ The figures in this column represent government pledges to UNICEF general resources at the pledging conference which took place on 7-8 November 1984. Many countries make pledges and payments later in the year.

c/ Decreases are shown in parentheses. In some cases, they are due to the fact that a government has not yet made a pledge or has made only a partial pledge. In other cases the decreases are due to the fact that the pledges remain constant in the foreign currency contributed but appear smaller after conversion into U.S. dollars of the prevailing exchange rates.

d/ Will announce at a later date.

e/ Not available. Starting in 1984, UNICEF began accounting for AG Fund contributions on the basis of program allocations rather than overall pledges.

f/ Total does not balance due to rounding.

1. Figures reflect new UN system of tying pledges and contributions to program activities in specific years and thus may vary slightly from information provided in previous reports.

2. No percentage shown for amounts of less than 0.01%.

3. Includes a portion of a total pledge of $40,880,503, to be paid over five years.

Initial Date of U.S. Participation. 1971.

Current Authority for U.S. Participation. 22 U.S.C. 2291a.

U.S. Contribution. For calendar year 1984, 39 countries pledged and/or contributed U.S.$ 12,522,900, of which the United States pledged U.S.$ 2,980,000 or 23.8% from fiscal year 1984 funds. The Fund's total income due in 1984, including public donations and interest, amounted to U.S.$ 13,084,942. In addition to the income due at 31 December 1984, the Fund had received future-year commitments totalling U.S.$ 40,923,830. From 1971 through 1984, 83 countries pledged U.S.$ 78,625,695 to the Fund, of which the United States pledged U.S.$ 38,250,000 or 48.6%.

[b] TC resources include the Technical Co-operation Fund and funds from UNDP and other extrabudgetary sources which are foreseen for actual implementation in 1985. Allocations to individual programmes in this table are only indicative, based on extrapolations of past experience and do not prejudge in any way the priorities to be set by Member States.
The amount of $33 000 000 is foreseen for actual implementation in 1985 while total new resources are expected to be $43 500 000. Of the latter $ 26 million (60%) represents the target for voluntary contributions to the TC fund for 1985.

EARMARKED CONTRIBUTIONS TO UNEP

According to Rule 203.2 of UNEP's Financial Rules, "Voluntary Contributions shall be accepted without limitations as to use for a specific project or purpose." This effectively precludes the earmarking of contributions. In some of UNEP's regional environmental programs, however, trust funds have been set up to finance activities of regional importance. These trust funds are managed under UNEP auspices until the regional organizations they serve become sufficiently advanced to be able to manage the funds themselves.

The U.S. is particularly interested in trust funds established for Regional Seas Program Plans of Action in the Caribbean and South Pacific. The U.S. has provided $600,000 in in-kind support for the Caribbean Program projects.

1/ Figures for Category I contributions are calculated using exchange rates in effect on December 8, 1980. This date was chosen because the rates then in effect were also used for establishing replenishment shares. Since several Category I countries made initial contributions in currencies which appreciated against the dollar in 1977-1980, the total Category I initial contribution appears here as $595 million rather than the $575 million pledged in 1977. Similarly, devaluations by a number of Category I members since December 1980 have reduced the dollar value of their replenishment contributions, and the overall Category I replenishment total. OPEC contributions are paid in dollars and are not affected by exchange rate movements.

1/ Loans approved in 1978 were denominated in US Dollars and are repayable in the currencies in which withdrawals are made. From January 1979, loans have been denominated in SDRs and for purposes of presentation in the Balance Sheet the accumulated amount of loans denominated in SDRs has been valued at US Dollar/SDR rate of .980205 at 31 December 1984. Since the loans were valued at 31 December 1983 at the then prevailing rate of 1.04695, there is a reduction in value, in terms of US Dollars, attributable to the movement in exchange rates from 31 December 1983 to 31 December 1984 of US $ 94 197 000 (1982 to 1983 - US $ (65 339 000)).

a/ The figures represent confirmed and expected pledges, rounded off in thousands of dollars.

b/ Commodities at donor's valuation.

c/ Received up to 24 October 1971. By resolution 2758 (XXVI) of 25 October 1971, the General Assembly, *inter alia*, decided "to restore all its rights to the People's Republic of China and to recognize the representatives of its Government as the only legitimate representatives of China to the United Nations, and to expel forthwith the representatives of Chiang Kai-Shek from the place which they unlawfully occupy at the United Nations and in all the organizations related to it".

d/ Includes contributions made by Abu Dhabi before being part of United Arab Emirates.

e/ Special contributions to the Government of Jordan (in 1971) and the Syrian Arab Republic (in 1977) for the benefit of the Palestine refugees, for which UNRWA acted as executing agent. As these contributions were used for purposes budgeted for by UNRWA, they have been included in the Agency's income and expenditure accounts.

UN PROFESSIONAL EMPLOYEES - RETIREMENT - 30 YEARS SERVICE AND 60 YEARS OLD W/SPOUSE
NEW YORK - FEBRUARY

*Annuitants contribute at 1/2 the rate of employees on active service.

**Secretary General's pension is 50% of gross salary payable at any age after serving a term of 5 years. Actual pensions for serving professional staff with 30 years service are 60% of the average of the highest 3 years of pensionable remuneration within the last five years of contributory service (service in excess of 30 years: Pension increases by 1% each year up to a maximum of 5%). For staff hired January 1, 1983, and later, pension will accumulate at rate of 1.5% for first 5 years of service, 1.75% for second 5 years, and 2% for all subsequent years.

Pensions shown on chart are computed on basis of 60% of the final average remuneration (FAR). FAR exceeds 60% of pensionable remuneration (PR) as shown in col. 3, because PR was lowered effective 1/1/85. Old, higher PR levels will continue to determine FAR, in full or in part, for the next 5 years.

STATION ALLOWANCES

Rent Plus Housing Allowances (RPHA), and Cost-of-Living Allowances (COLA) are authorized in oversea areas for uniformed personnel. RPHA includes three components: a maximum rental allowance, which is based on the 80th percentile of rental costs at the duty location; a utility allowance, which is based on average utility costs; and an initial occupancy (IO) allowance, which is normally a minor allowance reflecting average moving in costs associated with occupying an oversea dwelling. While RPHA defrays a significant amount of housing costs, COLA defrays the average excess costs experienced by members assigned overseas. These excess costs are derived by comparing the average costs of a market basket of goods and services in the oversea area to the same market basket in the United States.

Depending upon the specific oversea location, a member may receive either a RPHA or COLA or both. In some locations where housing and other living costs are negligible, neither RPHA or COLA are authorized.

Rent Plus Housing Allowances and Cost-of-Living Allowances for military personnel are authorized by Vol. I of the Joint Travel Regulations (JTR). Rates prescribed therein are not special allowances applicable to military personnel on MAAG assignment outside the United States.

The following are examples of allowances authorized at specific locations selected from Appendices A, B and C of the JTR, Vol. I:

	MONTHLY	
LOCALITY	COLA	RPHA
Denmark, Copenhagen	$87.00	$224.60
Germany, Heidelberg	None	$25.60
Spain, Madrid	None	$368.60
Morocco, Rabat	None	None
Mexico, Mexico City	None	$1083.60
Thailand, Bangkok	None	$558.60
Greece, Athens	None	None
Korea, Seoul	None	$333.60
Pakistan, Karachi	$29.00	None
Peru, Lima	None	$1339.60
Austria, Vienna	$203.00	$60.60

NOTE: COLA and RPHA are monthly for an O-6 with 27 years of service and 2 dependents. RPHA reflects rent (these examples reflect maximum allowance) plus utility and IO allowances minus BAQ.

Policies on Loans to Employees

Inter-American Development Bank

The Inter-American Development Bank (IDB) and Asian Development Bank (ADB) do not have loan programs for housing, furnitur and education comparable to those of the World Bank.

In the case of the IDB, employees can obtain loans for educational purposes from the IDB Credit Union and for housing purposes from the IDB Pension Fund. Both the Credit Union and the Pension Fund operate with employee funds and within the appropriate federal guidelines for such institutions.

Inter-American Development Bank

The Personnel Regulations of the Inter-American Developmen Bank permit the extension of interest bearing salary advances in the event of severe emergencies or as an assistance to employees who are relocated. The terms and conditions of these salary advances are:

Installation Advance -- Regular employees and full-time temporary employees with contracts of one year or more duration, are eligible for a salary advance for installation purposes at the new post of duty when they are contracted in a place different from their assigned post of duty or relocated to a new post of duty. Such employees may request an advance of up to one month's salary within a period of one year from the date of appointment or relocation. The advance must be repaid withi a maximum period of 18 months, or by the end of the employees contract, if it is less. As of July 31, 1985, there were 25 installation loans outstanding totaling $59,697. Before November 14, 1983, the interest rate was 4 percent. Since November 14, the interest rate is equal to the 90 day U.S. Treasury Bill rate in effect on the first day of the month of the loan's issue.

Emergency Advance -- Emergency advances are only granted in case of death in the family, grave illness, loss of property, etc. The requestor has to have exhausted other means of procuring the funds. The terms are determined by the gravity of the case. The interest is between 0 to 14 percent with maturities up to 3 years. The norm is 4 percent for 36 months.

There are currently 4 emergency loans for a total amount of $9,454 outstanding.

Policies on Loans to Employees

Asian Development Bank

Asian Development Bank (ADB) does not have loan programs for housing, furniture, and education comparable to those of the World Bank. The ADB does make the following loans available to its employees:

Setting-in loans -- New employees are eligible for a salary advance equivalent to three months' salary which is repayable over 18 months at 5 percent interest. An additional advance equal to $2,000 repayable in 12 months with interest at 6 percent per annum can be secured as can a subsequent advance of up to $2,000 which is repayable over 36 months at 10.5 percent. In 1984, 129 settling-in loans for $740,085 were made.

Other Advances -- The ADB will also make salary advances up to four months' salary, for advance rental payments, repayable over a period equal to the number of months of advance rental, with interest at 10.5 percent. In 1984, the ADB made 334 such loans for a total of $2,949,506.

Finally, the ADB will make special loans on compassionate grounds under the following terms: (1) advance of one months' salary after six months service repayable in six months at 10.5 percent intrest; (2) advance up to two months'salary after 12 months service, repayable in 12 months at 10.5 percent interest; (3) an additional advance of up to four months' salary after 24 months service repayable in 30 months with interest at 10.5 percent. In 1984, the ADB made 754 loans on these grounds for a total of $440,342.

In 1983, the ADB made a grand total of 1,217 loans and advances for a total of $4,129,933.

1/ Figures on staff loans (i.e., subject to interest) include principal only.

2/ Includes loans for university education of dependent children, education of staff member, education of staff member's spouse and for buying furniture.

Notes: (a) During FY84, 85.2% of the advances and 76.5% of the loans were granted to other than U.S. nationals.

(b) One case of default occurred in FY84 when a staff member who had an outstanding balance of $6,709.72 on his housing loan was terminated. The Bank's long-term interest is protected by a second lien on the house. A default reported last year has been partially repaid leaving a balance of $979.00. Attempts to collect these amounts continue.

THE

BANK
ATLAS
1985

INTRODUCTION

This eighteenth edition of *The World Bank Atlas*, in keeping with the previous editions, presents data on population, gross national product (gnp), and gnp per capita for 1982 in current U.S. dollars. This Atlas also presents preliminary estimates for each of these indicators for 1983 and average annual growth rates for 1973–82. New in this edition are data on life expectancy, infant mortality, and primary school enrollment. The data on gnp per capita remain the focal point of the Atlas, but the addition of some selected social measures broadens the picture of living conditions throughout the world. Also new is the greater use of text and charts to highlight some of the more instructive aspects of the data.

As a result of the Bank's continuing efforts to improve the coverage and comparability of its gnp data, the procedures for estimating gnp in U.S. dollars differ from those used in previous years. The principle of using average prices and exchange rates for a three-year base period to smooth the effects of fluctuating exchange rates remains unchanged. But the conversion factor for translating gnp in national currencies to gnp in U.S. dollars is now the simple average of the exchange rates for the current year and for the two preceding years; the latter two exchange rates are adjusted for differences between domestic inflation and U.S. inflation. In addition, the three-year base period for gnp conversion in the Atlas consists, in every instance, of the reporting year and the two preceding years. In the past the three-year base period used to calculate final figures in one Atlas was advanced a year from that used to calculate preliminary figures for the same year in the preceding Atlas. Now, the base period for all 1982 data is 1980–81–82, and that for all 1983 data is 1981–82–83. This change from previous practice ensures that the base period for preliminary 1983 data presented this year will be the same for that of the final 1983 data presented next year. Any changes between the preliminary and the final gnp per capita data will thus be due to revisions of the underlying national accounts and population, not to a change in the base period. Moreover, the assessments of national accounting systems, of the quality of national accounts data, and of the appropriateness of using the official exchange rate as the conversion factor have now been systematized. See the Technical Notes on page 28.

Despite these changes, it must be kept in mind that the statistical systems in many developing economies are still weak, and this affects the availability and reliability of data. Much effort has gone into standardizing the data—their definitions, coverage, timing, valuation, and other characteristics. But this standardization has not been possible for all countries. Readers should take these limitations into account in interpreting the data, particularly when comparing countries and country groups. Further, the gnp data shown in the Atlas provide only an approximate measure of economic conditions and trends in the countries of the world and reveal nothing about the distribution of income within countries.

TECHNICAL NOTES

The World Bank recognizes that perfect cross-country comparability of gnp per capita estimates cannot be achieved. Beyond the classic, strictly intractable "index number problem," two obstacles stand in the way of adequate comparability. One concerns gnp numbers themselves. There are differences in the national accounting systems of countries and in the coverage and reliability of underlying statistical information between various countries. The other relates to the conversion of gnp data, expressed in different national currencies, to a common numéraire, conventionally the U.S. dollar, to compare them across countries. The World Bank's procedure for converting gnp to U.S. dollars is essentially based on the use of the official exchange rate. For some countries, however, the prevailing official exchange rate does not fully reflect the rate effectively applied to actual foreign exchange transactions.

Recognizing that these shortcomings affect the comparability of the gnp per capita estimates, the World Bank has introduced several improvements in the estimation procedures. Through its regular review of national accounts of its member countries, the World Bank systematically evaluates the gnp estimates, focusing on the coverage and concepts employed, and where appropriate makes adjustments to improve comparability. The World Bank also undertakes a systematic review of exchange rates to assess their appropriateness as conversion factors. An alternative conversion factor is used when the official exchange rate for a country is judged to diverge by an exceptionally large margin from the rate effectively applied to foreign transactions.

In an effort to achieve greater comparability, the U.N. International Comparison Project has developed measures of gdp using purchasing-power parities rather than exchange rates. So far the project covers only a limited set of countries, and some inherent methodological issues remain unresolved. Readers are referred to Irving Kravis, Alan Heston, and Robert Summers, *World Product and Income: International Comparisons of Real Gross Product* (Baltimore, Md.: Johns Hopkins University Press, 1982).

As noted in the introduction, the estimates of 1982 gnp and per capita gnp published in this Atlas are calculated on the basis of the 1980–82 base period. With this method, the first step is to calculate the conversion factor. This is done by taking the simple arithmetic average of the actual exchange rate for 1982 and of deflated exchange rates for 1980 and 1981. The actual exchange rate for 1980 is multiplied by the relative rate of inflation for the country and the United States between 1980 and 1982; the actual exchange rate for 1981 is multiplied by the relative rate of inflation for the country and for the United States between 1981 and 1982.

This average of the actual and the deflated exchange rates is intended to smooth the impact of fluctuations in prices and exchange rates. The second step is to convert the gnp at current market prices and in national currencies of the year 1982 by means of the conversion factor as derived above. Then the resulting gnp in 1982 U.S. dollars is divided by the midyear population to derive the 1982 per capita gnp in current U.S. dollars. The preliminary estimates of gnp per capita for 1983, shown together with the 1982 estimates, are calculated by the same method, but with 1981–83 as the base period.

The estimates of population are primarily from the U.N. Population Division. In some cases the population estimates were adjusted by the World Bank. Refugees not permanently settled in the country of asylum are generally considered to be part of the population of their country of origin.

Growth rates of population, gnp, and gnp per capita for 1973–82 are average annual growth rates that have been computed by fitting trend lines to the logarithmic values of population, gnp, and gnp per capita at constant market prices for each year of the time period.

The group averages for gnp per capita are derived by dividing the sum of gnp figures in current U.S. dollars by the sum of population. The group averages for the social indicators are the population-weighted arithmetic means of the respective indicator values for each country in the group. These averages could be considered as approximations of "normal" values for the respective country groups. Since the coverage of countries among the indicators depends on the availability of data and is not uniform, caution must be exercised in relating averages of one indicator to another.

The primary sources for data on life expectancy, infant mortality, and primary school enrollment are the publications of specialized international agencies, supplemented by data from World Bank data files. Despite the difficulties in achieving comparability in definitions and coverage, the indicators are useful for describing orders of magnitude, indicating trends, and characterizing major differences between countries. For the gross primary school enrollment ratios, the most recent estimates have been used if data were not available for 1982. (Throughout the Atlas, the data for China do not include Taiwan.)

Scholars and statisticians interested in a fuller and more technical explanation of the method used in compiling the gnp per capita figures for the Atlas are invited to address their queries to the Comparative Analysis and Data Division, Economic Analysis and Projections Department, The World Bank, 1818 H Street, N.W., Washington, D.C. 20433, U.S.A.

ABOUT THE WORLD BANK

The World Bank is a multilateral development institution whose purpose is to assist its developing member countries in furthering their economic and social progress so that their people may live better and fuller lives. The term "The World Bank" refers to two legally and financially distinct entities: the International Bank for Reconstruction and Development (IBRD) and the International Development Association (IDA). The IBRD and IDA have three related functions: to lend funds, to provide economic advice and technical assistance, and to serve as a catalyst in stimulating investment by others. Thus, the World Bank helps to support a wide variety of projects, large and small, public and private, chiefly in the following fields: agriculture and rural development, education, energy, industry, population planning, technical assistance, transport, telecommunications, urban development, and water supply.

The IBRD finances its lending operations primarily from borrowings in the world capital markets. IDA extends assistance to the poorest countries on easier terms, largely from resources provided by its wealthier members. Funds from such other sources as governments, commercial banks, export credit agencies, and other multilateral institutions are increasingly being paired with World Bank funds to cofinance projects.

As part of its work the Bank tries to help countries deal more effectively with the social aspects of economic development, such as rural poverty, income distribution, and rapid population growth.

The World Bank also provides loans to help developing countries adjust their economic policies and structures in the face of balance of payments problems that threaten continuing development. And a short-term special action program has the goals of developing exports, financing imports for critical productive activities, and rehabilitating and modernizing infrastructure.

The International Finance Corporation (IFC), an affiliate of the World Bank, works to further economic development by promoting growth in the private sector of developing countries. Using its own resources and working closely with private investors from around the world, it helps to mobilize foreign and domestic capital to invest in commercial enterprises.

As of 31 December 1984, 148 countries were members of the IBRD, 132 of IDA, and 126 of the IFC.
